## **ENEL GREEN POWER ACQUIRES PADOMA WIND POWER FROM NRG ENERGY**

- *Padoma is developing about 4,000 megawatts (MW) of potential projects in California*
- *The parties to evaluate co-investments in renewable energy projects in North America*

**Princeton, NJ, Andover, MA, Rome, Italy - January 21, 2010**—NRG Energy, Inc. (NYSE: NRG) and Enel North America, Inc., a subsidiary of Enel Green Power, the renewable power company of Enel S.p.A., have closed an agreement for the sale of NRG's land based wind development company, Padoma Wind Power LLC ("Padoma"), to Enel North America (ENA).

Based in La Jolla, California, Padoma is developing about 4,000 megawatts (MW) of potential projects in California which, once built, will help the state meet its Renewable Portfolio Standard target of 33% of retail sales from eligible renewable energy resources by 2020. Enel North America will retain the entire Padoma development team and the current Padoma development pipeline in California and Texas ("The Padoma Projects"). NRG is maintaining its existing ownership interest in its three Texas wind farms—Sherbino, Elbow Creek and Langford—totaling almost 350 MW of electricity.

The two companies also reached a more general co-investment agreement. NRG will retain a Right of First Offer should ENA seek an equity partner in The Padoma Projects. In addition to that, ENA and NRG will evaluate joint venture opportunities in wind as well as other renewable energy projects in North America.

*"Padoma's current pipeline in California and the experience of its development team will further strengthen our position in the United States and provide us with solid opportunities to grow in attractive markets in the future,"* said Francesco Starace, President of Enel Green Power. *"Padoma adds depth to our North American development capabilities and provides key geographical diversification to our wind pipeline."*

*"Enel's experience and resources will enable Padoma to realize the full benefits of its development potential, increasing the pipeline of renewable investment opportunities for NRG's consideration,"* said David Crane, President and CEO, NRG Energy, Inc. *"Padoma had considerable success developing terrestrial wind projects under NRG's ownership and we look forward to working with Padoma and Enel and investing in their projects in the future. NRG believes in the value of strong and strategic partnerships such as this one and together, we hope to speed the deployment of new, cleaner power generation projects to meet growing energy demand and respond to future state and federal renewable energy requirements."*

### **About Enel Green Power and Enel North America**

Enel Green Power is the renewable power company of Enel S.p.A. aimed at developing and operating power generation from renewable sources in Italy and around the world. The company's business incorporates all of Enel's activities in the wind, solar, geothermal, hydro and biomass fields in Europe, North America and Central and South America. With about 4,700 MW of installed capacity and 17.2 TWh of produced electricity in 2008, Enel Green Power is a leading global company in renewables. Enel North America, Inc. is a subsidiary of Enel Green Power and operates all EGP renewable energy plants in 20 U.S. States and in three Canadian Provinces.

### **About NRG Energy**

NRG Energy, Inc., a Fortune 500 company, owns and operates one of the country's largest and most diverse power generation portfolios. NRG's 50 plants provide approximately 24,000 MWh of generation capacity—enough to power nearly 20 million homes. In November 2007, NRG won two of the industry's highest honors—Platts Industry Leadership and Energy Company of the Year awards. Headquartered in Princeton, NJ, NRG is a member of the U.S. Climate Action Partnership (USCAP), a group of business and environmental organizations calling for mandatory legislation to reduce greenhouse gas emissions.
