## ENEL GREEN POWER STARTS OPERATIONS AT ROCKY RIDGE WIND FARM IN OKLAHOMA, USA

*The new wind farm has a total installed capacity of 150 MW. The fully operating plant will produce more than 600 million kWh per year.*

**Rome, July 2<sup>nd</sup>, 2012** - Enel Green Power, through its US subsidiary Enel Green Power North America Inc. (EGP NA), has started operations at the Rocky Ridge wind farm, located in Kiowa and Washita counties, Oklahoma.

The new wind farm has a total installed capacity of about 150 MW, and is composed of 93 turbines of 1.6 MW each. The fully operating plant will generate over 600 million kWh per year, thus avoiding more than 450 thousand tons of CO<sub>2</sub> emissions into the atmosphere annually. The energy generated by the new wind farm will be purchased by the local utility Western Farmers Electric Cooperative.

For both the Rocky Ridge and Caney River wind farms, EGP NA reached a tax equity partnership agreement – worth about 340 million US dollars – with a syndicate led by JP Morgan. The partnership was announced last January.

*"With Rocky Ridge, Enel Green Power continues its solid growth in the United States, which has one of the most open and competitive markets in the world," stated Enel Green Power CEO Francesco Starace. "Such an achievement demonstrates our consolidated capacity to execute important investments quickly and with satisfactory returns."*

Rocky Ridge spreads over 18,000 acres of land leased from 75 owners. The wind farm created some 150 jobs during construction, and now that it is fully operational, about 10 for plant management and maintenance.

**Enel Green Power North America**, subsidiary of Enel Green Power, is a leader in the North American renewable energy sector, with plants operating or under construction in 21 US states and three Canadian provinces. EGP NA operates and manages more than 70 plants, with an installed capacity in hydroelectric, wind, geothermal, solar and biomass of 1,238 MW, including the new Rocky Ridge plant.

**Enel Green Power** is the Enel Group company fully dedicated to the development and management of renewable energy sources at the international level, with operations in Europe and the Americas. The company generated 22.5 billion kWh in 2011 from water, sun, wind and the Earth's heat - enough to meet the energy needs of more than 8 million households and avoid the emission of over 16 million tons of CO<sub>2</sub> into the atmosphere. Enel Green Power is a world leader thanks to its well-balanced generation mix, providing generation volumes well over the sector average. The Company has an installed capacity of over 7,100 MW from a mix of sources

Enel Green Power SpA Registered Office 00198 Rome - Italy, Viale Regina Margherita 125 - Companies Register of Rome, Tax I.D. and VAT Code 10236451000 - R.E.A. of Rome 1219253 - Stock Capital Euro 1,000,000,000,00 fully paid in - Management and coordination by Enel SpA.
