ENEL AND CONFAGRICOLTURA JOIN FORCES FOR INNOVATION AND SUSTAINABLE DEVELOPMENT IN FARMING

Micro-power plants, energy efficiency, gas and electricity supply and a help desk for member farming firms and families are central to the Enel-Confagricoltura partnership

Rome-Rimini, November 9th, 2012 – Enel and Confagricoltura (the Italian farmers' association) sign an agreement at the "Ecomondo" trade fair in Rimini, to work together towards sustainable development in support of the agro-energy industry.

Central to the agreement is the setting up of a "Sportello Qualità" a help and information desk aimed at providing members of the farmers' association with an efficient, continuous assistance service, promoting the opportunities offered by the Enel and Confagricoltura partnership and organising meetings on subjects of common interest.

The Chairman of Confagricoltura, Mario Guidi, has also signed all the other implementation protocols for the framework agreement between Confagricoltura and Enel, which was signed last spring at the Taormina Academy. This partnership will offer member farming firms and families new services, special offers and expert assistance in order to provide them with support and open up new opportunities.

With regards to services such as energy efficiency and distributed micro-generation in particular, Enel.si, the Enel Green Power retail subsidiary, will be making available low voltage photovoltaic kits, mini-wind farms, mini hydro-electric power plants and small-scale biomass plants. It will also be possible for members to purchase thin-film technology photovoltaic panels at a discounted price.

Members may also benefit from special offers for their gas and electricity supplies, with an efficient personalised assistance service.

In addition, Enel Energia and Enel.si will arrange for energy analyses and audits to be carried out and will provide services to improve the efficiency of production systems, install and maintain heating systems as well as building insulation and lighting systems.

All Enel press releases are available in versions for Smartphones and Tablets. You can download the Enel Mobile App at: [Apple Store](#) , [Google Play](#) and [BlackBerry App World](#).
