

INCENSE awards 28 startups with up to 150,000 euros each in second open call

- INCENSE is the only CleanTech and energy accelerator co-funded by the European Commission as part of its FIWARE Accelerate programme.
- INCENSE's second open call was launched on June 15th, 2015. The winners were selected by external experts and consortium partners from over 250 applying startups that come from across Europe and Israel.
- INCENSE has an overall budget of about 8 million euros for support of the 42 startups selected through two open calls. Other support services offered by INCENSE partners include a six-month acceleration programme.

January 19th, 2016

INCENSE (INternet Cleantech ENablers Spark), the business accelerator dedicated exclusively to clean technology and energy that is being supported by the European Commission's FIWARE Accelerate programme, has selected the 28 winning startups of its second open call during a ceremony held today at Enel's headquarters in Rome.

The event saw the participation of Italian Minister of Labour and Social Policy Giuliano Poletti, Enel CEO and General Manager Francesco Starace, Innovation Adviser to the Italian Prime Minister Paolo Barberis, Member of the Permanent Advisory Board for the Innovation and Digital Agenda of the Italian Government Francesco Sacco and two representatives of the European Commission, the Director of the Institute for Energy and Transport DG JRC Giovanni De Santi and the Head of Sector for the FIWARE Programme DG CNCT Ragnar Bergstrom.

"With INCENSE, Enel confirms once again its commitment to support innovation, entrepreneurship as well as social and economic growth," said Enel CEO **Francesco Starace**. *"The work that the winning startups will carry out throughout the acceleration period is aimed at developing players capable of creating effective solutions, as can be seen with the first call winners, some of which are working on joint projects with Enel."*

INCENSE is an initiative launched by Enel, Endesa, Accelerace and FundingBox that aims to encourage innovation and high-tech employment in the European energy and cleantech sector.

Below are the 28 winning startups.

Name	Country
Isotrol S.L.	Spain
Itestit S.L.	Spain
Nnergix Energy Management S.L.	Spain
Albufera Energy Storage S.L.	Spain
Aeroum Espana S.L.	Spain
Green Momit S.L.	Spain
Interfaces Hombre Maquina Avanzados S.L.	Spain
Big Data for Business Solutions S.L.	Spain
Ezzing Building Synergies S.L.	Spain
Archon Technologies Srl	Italy
Atooma Srl	Italy
Toi Srl	Italy
Midori Srl	Italy
Greenlab Engineering Srl	Italy
Leaf S.p.A.	Italy
Scuter Srl	Italy
Leapcraft ApS	Denmark
Innogie ApS	Denmark

Nikolaos & Marinos Livanos O.E.	Greece
AugWind LTD	Israel
Tamuz Energy LTD	Israel
Noven BVBA	Belgium
Fourdeg Oy	Finland
Ecoglobe GmbH	Germany
Ionseed Lda	Portugal
Evreka Ltd	Turkey
Aerial Power Limited	United Kingdom

Each winner will receive a free grant of up to 150,000 euros without equity considerations and support services offered by INCENSE partners. These services include a six-month acceleration programme, additional coaching sessions, tailored workshops on European funding programmes, and the business support provided by INCENSE partners and network. The startups also have the chance to collaborate with INCENSE partners in the development and testing of their projects.

In total, INCENSE, which has an overall budget of about 8 million euros funded by the European Commission, will offer its support up to 42 startups.

INCENSE's second open call was launched in June 2015 and gathered 257 applications from Europe and Israel through the website www.incense-accelerator.com. The submissions, which came from

SMEs and entrepreneurs, were classified under the following categories: Energy Efficiency & Home Automation, Renewable Energy, Renewable Forecasting Solutions, Smart Grids, Energy Storage, Advanced Diagnostic & Automation Solutions, e-Mobility, Cyber-Security and Digitalization of Energy through ICT.

The 14 startups selected in the first call concluded their acceleration programme in December and almost half of them are collaborating with INCENSE corporate partners to further develop their projects.

INCENSE is coordinated by Enel, a multi-national power company and a leading integrated player in the world's power and gas markets, with a particular focus on Europe and Latin America. Other partners include Enel subsidiary Endesa, Spain's number one electricity business, Accelerace, a leading accelerator in northern Europe that has experience in supporting startups, and FundingBox Accelerator, which is the largest global public funding platform for startups and researchers. The competition winners will benefit both from the experience of these partners and the opportunities that the Enel Group's large customer base and global presence could offer their products and services.

The FIWARE Accelerate Programme is the third phase of the Future Internet Public Private Partnership (FI-PPP) Programme, which was launched by the European Commission in 2011. The FI-PPP Programme has involved key European technology businesses in the development of an internet-based free technology platform (FIWARE), and had a budget of 400 million euros for its first two phases. The third phase, which has a budget of 80 million euros, aims to offer market access to products and services based on these technologies by supporting SMEs and web entrepreneurs, aiding the development of a new generation of European startups and encouraging high-tech employment.
