# Futur-e Business View

# At a glance

23

power plants involved

(Oil & Gas, Oil, Gas, Turbogas,  
Combined Cycle, Carbon)

Production (TW/h)

Operating hours

Load factor

Between  
2008  
and 2014

13<sup>GW</sup>

total power to be  
decommissioned

# Drivers

## Sustainability

### Environmental

Reusing materials and buildings  
Reducing CO2 emissions

### Social

Redeployment of employees  
Retraining

### Economical

Valorisation of real estate  
Development of new local opportunities

## Innovation

### Technology

New industrial approach  
Change towards evolved systems

### Energy

Carbon-neutral  
Renewable sources

### Culture

Sites available for permanent initiatives  
Call for ideas and projects

## Relationship

### Participation

Involvement of local communities  
Preventative listening

### Alliance building

Local stakeholder  
Opinion leaders

### Communication

Site-by-site messages  
Transparency

# Possible evolutions

- **Alternative Production Processes** (algae production, 3D printing, improved food processing, etc.)
- **Commercial Activities** (luxury outlets, multifunctional commercial areas, etc.)
- **Services** (data centers, hospitals, university campuses, etc.),
- **Sport business** (Sport city)
- **Tourism** (resorts, amusement parks, etc.).

# Advantages

- No issues from workforce
- Local stakeholders are on board
- Community involvement
- Idea labs and Calls for projects
- Partnership with Enel
